

DECARBONISATION IN EUROPE SUMMIT

The Energy Transition Series

OVERVIEW

Be ready to be at the forefront of Europe's Energy Transition. Set against the backdrop of the EU's 2030 emission reduction goals and the European Commission's ambitious targets for climate neutrality by 2050, this is your chance to be a decisive actor by being a part of inspiratia's inaugural Decarbonisation in Europe Summit in Amsterdam!

Europe's energy transition holds unfamiliar challenges and opportunities. From transportation infrastructure to grid access, to investment pipelines, to creating robust regulatory frameworks, and addressing natural resource availability, the journey towards decarbonisation calls for innovation, transparency, and collaboration across the board.

The Decarbonising Europe Summit is your platform to meet, collaborate, learn, and network. Connect with the energy transition pioneers ranging from commercial lenders, institutional investors, developers, IPPs, policy makers, leading utilities who are at the forefront of leading the charge towards net-zero.

Expect to partake in executive roundtable, industry panels, exclusive networking opportunities, and interactive workshops. With 200+ in attendance, be one of the energy transition's pioneers and position yourself as one its actors.

Make the most of leading, innovating, and making long-lasting connections on the road for a sustainable future. Be a part of the frontrunners driving Europe's decarbonisation, secure your place now.

JUNE 2025 - AMSTERDAM

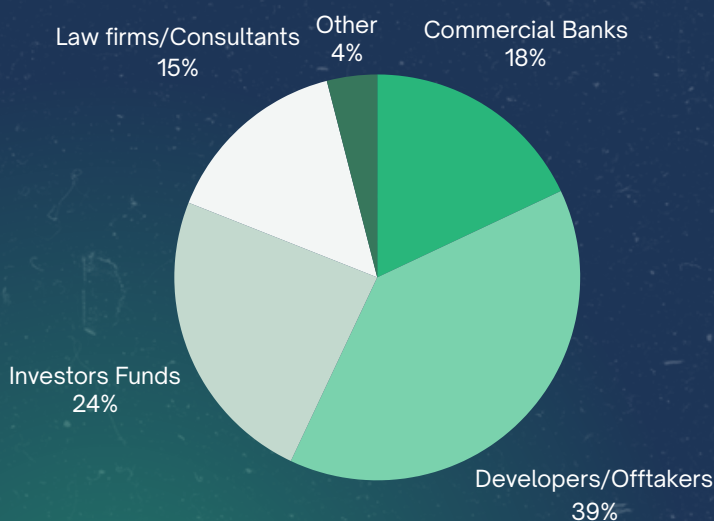

DECARBONISATION IN EUROPE SUMMIT

The Energy Transition Series

WHY ATTEND

- **Cutting-edge discussions:** Dive into the latest updates in the sector from evolving financing structures to technologies like data centers, supply chains, sustainable aviation fuels, and much more!
- **Energetic formats:** Engage with industry leaders and experts as they address the latest challenges and opportunities in the industry.
- **In-depth sector sessions:** Gain unique insights into specific asset classes and what is needed to push momentum forward
- **Networking opportunities:** Connect with decision-makers. Our interactive sessions and custom networking-app are designed to help forge lasting connections.
- **Future-focused:** Be at the edge of Europe's decarbonisation strategies.

JUNE 2025 - AMSTERDAM

DECARBONISATION IN EUROPE SUMMIT

The Energy Transition Series

2025 AGENDA THEMES

Building blocks for the energy transition: Analysing the opportunities within transportation infrastructure, including ports development, impact on supply chain capacity, scalability, and investment opportunities

Capacity hurdles: Addressing the growing need for expanded storage capacity and grid access to push further enable developments

Investment opportunity deep-dives: Exploring the financing opportunities across energy asset classes ranging from sustainable aviation fuels, hydrogen, nuclear, CCUS, e-fuels, data centres, and much more

Regulatory frameworks: Explore how industry players are balancing the EU's climate neutrality goals with reduction targets – is there a mismatch with reality?

Sustainable aviation fuels: Evaluating the sufficiency of initiatives like ReFuel EU Aviation and the EU Taxonomy in accelerating its adoption

Emerging technologies: Exploring alternatives to existing technologies such as solid-state and sodium-ion batteries

Natural resources and supply chains: How can financiers and developers alike ensure reliable and ethical supply chains for critical resources? How are lenders' demands evolving as compliance and due diligence becomes more stringent?

Data centres and grid capacity: The emergence of grid competition between renewables and data centres. How will the role of AI help optimise energy use with the grid and other sectors?
